LEARNING

As the workforce becomes more distributed and more flexible in terms of work hours or locations, it is becoming more cost effective and efficient for organizations to provide online learning or eLearning to their staff.

Organizations are converting live classes into online courses for distribution to learners via the Internet or intranet - wherever they are. In many cases businesses are converting almost all of their learning content into online learning and that is where NetDimensions eLearning solution is a perfect fit.

Designed as a pure web-based learning solution, NetDimensions eLearning enables businesses to realize the full potential of online learning and development programs. NetDimensions eLearning also includes our robust and sophisticated NetDimensions Exams application as part of this solution.

Key Features of NetDimensions eLearning:

Exam Engine

NetDimensions Exams is a robust, sophisticated exam authoring and delivery environment. Originally developed to meet the demanding requirements of highly regulated industries, this exam engine enables exams to be treated and delivered as learning objects.

Flexible and Configurable UI

NetDimensions eLearning's user interface provides drop-down menus, which makes it very easy for users to navigate the site and customize to suit their needs. Course listings provide all the necessary information about the courses, including graphical progress bars for each enrolled course, and exam status icons for courses that include exams or course evaluations. Launching a course is always just one click away.

Catalog Search

The Catalog Search allows maximized flexibility and sophistication in organizing and managing extensive content. Organizations have the option to display course catalogs in a graphical or hierarchical tree-oriented structure and to sort them into different columns.

Composite Programs

"Programs in Programs" allow the selection of learning program sessions within learning program sessions. This allows administrators and learners to follow specific paths or optional paths. An excellent use case is when learners have to follow a specific path to gain a certification or achieve compliance.

User Groups

User Groups enable arbitrary groups of users, possibly spanning different organization's to be set-up in NetDimensions eLearning. This feature saves an administrator a lot of time by having the ability to create user groups and then enroll users by group or auto enrollment.

Quick Polls

Quick Polls allow a survey to be attached to a news article, delivered through the home page. The poll result is displayed graphically to users who have answered the survey. It provides a quick and easy way for administrators and managers to gather information about certain topics.

Use of Widgets for easier Customization

New charts and other widgets are introduced to provide the homepage more options for different kinds of information. This makes it much easier for and convenient for users to customize their home page.

JavaScript SCORM API Adapter

It allows SCORM courses to run without a Java Runtime Environment (JRE) installed, making it possible to run courses on iPhones and iPads, as well as Android and Blackberry devices. This API Adapter removes the need to have Java installed on learner's computers and saves administrative and learner time.

Enhanced Confluence Wiki Integration

Users can create Confluence Wiki spaces for new courses from within NetDimensions eLearning and grant user permissions for the appropriate space when they enroll in a course, as well as revoke permissions when they withdraw. This addition makes it easier for learners to get to the relevant wiki spaces for courses and additional materials instead of logging into Confluence separately.

Approval Delegation

Managers and administrators can delegate approval authority to other users for a specified period of time. This works for both internal and external approvals, allowing another person to be delegated to approve users other than those that report to them and streamlines the approval process where normally there is just a single approver.

Easy-to-use Report Wizard

Collapsible Sections, Grouping, Drag and Drop ordering are just a few of the features that make it quick and easy to generate reports.

Plug-ins for 3rd Party Content Platforms

NetDimensions eLearning's plug-ins enable clients to display content from the system -- including the latest courses, enrollments, news, training plans and certifications -- on platforms such as:

- Google apps (via gadgets in iGoogle, Gmail, Google calendar),
- Wordpress sites (via widgets/plugin-ins)
- Confluence Wiki (via plug-ins/macros)

Contact us today to find out how NetDimensions eLearning can simplify the management of your organizations' performance, knowledge and learning initiatives.

NetDimensions®

Performance.
Knowledge.
Learning.
