Project Manager

New clients, projects and support commitments means that are recruiting another **Project Manager** to join the Belfast team.

We are looking for someone who not only has the right experience in software project management but who is also enthusiastic, passionate about what they do, self-motivated, approachable, with a commitment to excellence and success for all.

Responsibilities

- Manage multiple projects through the full project lifecycle.
- Create project plans reflecting the appropriate project lifecycle through: requirement capture, work definition, estimating and scheduling that will include all milestones, activities, and resources that need to be delivered.
- Manage and monitor the project plan and lead and motivate the project team to ensure successful completion of activities and delivery of the project to schedule, budget & agreed quality standards.
- Manage the project scope and maintain project documentation.
- Actively manage the Risk & Opportunity Management process for the project ensuring the development and implementation of appropriate mitigation activity.
- Report project status through Senior Management and Customer reviews, ensuring the development and implementation of recovery plans where necessary.
- Act as the main point of contact for customer stakeholders, satisfying customer requirements, building strong relationships and developing opportunities for increased business.
- Ensure "Lessons Learned Management" is applied to all projects, entailing application of lessons from other projects and capturing lessons learned on specific projects under your control.

Essential

- 3rd Level Qualification (Business, Engineering, Science or IT)
- Minimum 3 years' experience as a Project Manager in the software industry.
- Excellent, professional project management skills.
- Project Management qualification (e.g. Prince 2 or CMMi etc.)
- Proven ability to influence and manage complex customer stakeholder relationships.
- Experience of managing multiple projects through the full project lifecycle.
- Experience of working within an agile development environment.

- Demonstrable leadership and management skills.
- Proven strong negotiation and influencing skills.
- Proven self-management and organisational skills.
- Excellent communication and presentation skills.
- Excellent problem solving skills.
- Willing to travel.

Desirable

- Experience in the educational software industry.
- Scrum

Salary: Negotiable based on experience.

We offer continuous professional development opportunities and a range of other benefits including a contributory pension scheme and health plan.
