

UX (Web) Designer

As the successful candidate you will have a dynamic approach with exceptional web and UX design skills.

Reporting to the Product Development Manager, you will have freedom to work directly with clients on varied projects (learning portals, e-learning programmes, application front end user interfaces, product simulations and game-based learning applications), whilst working with a close-knit team of instructional designers, design professionals and web application developers.

Essential Criteria:

- 3rd level design qualification.
- Minimum 3 years' experience as a Web or UX Designer in a commercial working environment.
- Proficient in the Adobe Creative Suite (Dreamweaver, Flash, Photoshop, Illustrator and/or Fireworks).
- Javascript - jQuery - Ajax - JSON
- CSS3, including a preprocessor such as SASS
- Designing and building responsive web applications with graceful degradation
- Knowledge of UI design patterns and best practices
- Designing high fidelity mock-ups/prototypes from wireframes
- Proficient in HTML4/5, CSS2/3
- Ability to design creative user interfaces that adhere to best practice user interface design principles.
- Practical experience of addressing cross browser issues and accessibility.
- Ability to function independently with general oversight and direction within parameters provided.
-

Essential Frameworks

- Bootstrap 3

- Angular JS
- Knockout.js

Essential Environments/Software

- Comfortable working in ASP.Net MVC projects
- Visual Studio
- Sound knowledge and design skills in Adobe Creative Suite (Photoshop/Illustrator)

Desirable Criteria:

- Experience developing front ends in DotNetNuke CMS.
- Working Knowledge of Umbraco 7 CMS.
- Experience designing CSS skins for LMS or similar propriety applications.
- Version control experience (GIT or SVN).
- Experience in developing cross platform resources for desktop and mobile platforms.
- Teaching/training experience.

Location: Belfast

Salary: Negotiable depending upon experience + benefits
