

Software Tester/QA Engineer

Aurion Learning is a Belfast-based, multiple award winning company delivering innovative online applications for learning and development throughout the UK and Ireland. Aurion has a requirement for a Quality Assurance Engineer to join our successful and expanding team.

Job Description

This position will provide the candidate with exposure to all areas of the QA life cycle process and the opportunity to work closely with dedicated and professional software development and support divisions.

The Development team, work closely with clients and business analysts to modify and develop customizations as per client requirements. The role will require a close working relationship with development team & project manager, with the responsibility of providing a comprehensive test strategy for each release.

In this role you will develop and implement software quality and testing programmes in order to meet identified goals, within agreed times scale and quality parameters. The post-holder will take responsibility for the test planning and execution throughout the product lifecycle for both “generic” products and bespoke products.

Duties:

- Take ownership of our product portfolio & customization test strategies/deliveries.
- Develop test plans & cases.
- Functional testing and regression testing.
- Liaison / interface with clients.
- Customer Support

Requirements:

- Effective communication skills & ability to work on own initiative.
- Excellent understanding of QA processes and the Software Development Lifecycle.
- Exposure to defect tracking tools
- Experienced at translating business/functional requirements into test requirements.
- Strong attention to detail.
- Excellent analytical skills.
- Methodical approach to QA.
- Ability to follow issues through to resolution.
- Can manage and prioritize tasks with a sense of urgency.
- Able to reinforce thoughts and ideas of others and challenge assumptions.
- Able to think creatively and propose options/solutions to challenges.

Essentials

- 3rd Level Qualification (IT/Computing)
- 1 - 2 Years QA/Testing experience
- Scripting and automation experience

Desirable (But not essential)

- Experience in the educational software industry
