

## **Instructional Designer**

At Aurion Learning, an Instructional Designer plays a key role in the design of collaborative digital learning solutions for our clients. The role requires you to work collaboratively with client subject matter experts to clearly define the digital learning content, develop storyboards and work with colleagues during the development of the learning resource.

As an Instructional Designer, you will typically operate within a distributed team, across multiple projects, and contribute to the development of our organisation, culture, and working practices.

### **Key Responsibilities**

As an Instructional Designer at Aurion Learning, you will be responsible for:

- Own the relationship with the client team for the design of the digital learning content.
- Design content plans and storyboards within the agreed project processes and standards that illustrate the structure and content components of the learning resource.
- Liaise with the Learning Development Team for the design of assets such as diagrams, illustrations, characters, and source imagery for the project.
- Liaise with the AV specialists as required to help scope and support the production of AV requirements.
- Provide progress information to the Project Manager via the appropriate mechanisms so that progress and achievement can be tracked.
- Support the development of ideas, concepts, templates, processes, and tools within the team.
- Working across a range of internal and external projects.

### **Person Specification**

#### **Essential**

- Minimum of three years' experience as an instructional/learning designer designing digital learning materials.

- Experience in facilitating client workshops to create an overall teaching model using multiple media.
- Excellent written and verbal English language skills.
- Strong attention to detail, excellent problem-solving skills, and flexibility.
- Working knowledge of current trends and practices within technology-enhanced learning.
- Excellent relationship-building, management, and communication skills.
- Ability to use a variety of IT solutions (MS Office specifically Outlook, PowerPoint, and Word).
- Excellent time management skills, prioritising activities and managing multiple internal and external requirements.
- Good presentation skills.

### **Desirable**

- Third level qualification in teaching, instructional design, or a related field.
- Experience in the development of digital learning content using authoring tools.
- Experience designing learning content for the health sector.
- Experience in the scripting of AV materials.
- Experience within a media production environment.
- Experience in the design and delivery of classroom-based training courses.
